Cabin Air Filter Installation Sheet

LOCATION: ENGINE COMPARTMENT
QUANTITY USED: 1
DEGREE OF DIFFICULTY: EASY
ESTIMATED INSTALLATION TIME: 2 TO 5 MINUTES

SAFETY NOTE:
PRIOR TO PERFORMING A CABIN AIR FILTER REPLACEMENT, ENSURE THAT THE VEHICLE’S ENGINE IS TURNED OFF

INSTALLATION INSTRUCTIONS

• Enter the vehicle through the passenger side door
• Remove the instrument lower passenger panel as it's referred to in the service manual. It's the black plastic cover underneath the dashboard on the passenger side. Simply pull down on it to disconnect the clips as shown in the photo (Fig. 1)
• Put the cover aside and move on the passenger side kick panel. Remove the black plastic nut shown in the photo (Fig. 2)
• Remove the weather-stripping at the passenger kick panel by pulling it towards you as shown (Fig. 3)
• Remove the passenger kick panel trim by pulling it away from the passenger door to disconnect the clips (Fig. 4)
• Remove the 2 screws at the bottom of the glovebox, one on each end as shown (Fig. 5)
• Remove the 4 screws at the top of the glove box as shown (Fig. 6)
• Pull down on the glove box as shown to gain access to the HVAC blower (Fig. 7)
• The filter is behind a white plastic door that opens at the right and hinges at the left (Fig. 8)
• Open the cabin air filter access panel door (Fig. 9)
• Remove the used cabin air filter and replace the used cabin air filter with a new cabin air filter ensuring that the filter is placed with air flow markings in the correct direction
• Reverse the above procedures to reassemble the vehicle
